

#5 PANTHERA; 8/27/2023 - Interspecies Roundtable

Interspecies Roundtable:

- **Panthera Expert Guest Wynter Worsthorne:**
 - Lion Cloth is was gifted is always with her in ceremonies of any kind
 - He's even been in South African parliament for them to be able to have a seat at the table
 - Lions drew me into this work - grew up fascinated with them
 - We lived in Johannesburg - an hours drive from the Lion Park - I just wanted to be with Lions
 - Whenever big stuff was up the lions would come to me in my dreams and I'd always feel safe
 - Grew up saying I wanted to work with lions - mother didn't think it would happen and I believed her for a while, so instead of zoology, veterinary school, I studied art - but the Lions kept calling to me (mom encouraged animal loving side of me)
 - In my late 20's I started my journey of animal communication (mentored by Kinkaid)
 - Read Linda Tucker's book - Mystery of the White Lions and touched something in me - I'd never known anything about them until then
 - Saw lions afterwards - I did a communication between them
 - Emailed her about it, not knowing how she would respond
 - Met her a few months later (2002) with an infamous conservationist
 - In year of 2000, Linda was trying to get the Lioness Lara (born on Christmas Day in Bethlehem) to freedom.
 - We started working together - she had gone on to create White Lion Protection Trust, got Lara out of the zoo into the heartlands into the Timbavati Area (only place white lions are naturally - translates to place where Star Lions came from) and her book goes into this and the sacred science of it all
 - White Lions seen as sacred messengers from God by indigenous people of the area - also known as the Star Lions
 - White lions live with goldens as well
 - Lone White Lioness hunting, leaving food, and calling in rest of the pride to eat
 - Atypical - usually she eats first
 - Different energy with them in the field - bit more communal
 - White Lion Project - started with privately protected pieces of land not within Timbavati because couldn't protect those pieces
 - Working to get the hunting laws changed - parliamentary work
 - From Lara and 3 children, prides have expanded
 - Mandla White Male Lion was rescued from captive breeding industry - was a stud - industry breeds lions to hunt
 - He had never been able to spend time with mate or babies

- Introduced to Lara's daughter Zyra and had a family together
- They had both been born in captivity but children were wild and they live as wild lions
- Even though they were both hand reared - she taught herself and then her cubs how to hunt
- The man who raised Mandla went to visit him - and he wouldn't greet him
- I shared a bond with Mandla and it felt like he was my father - he left his body at 20 yo - and he is still there giving guidance to all of his followers - he comes to so many in meditations and dreams
- In communication I would connect with him both physically and astrally - when he would give important messages to humanity
 - He gave a date 3/8 Pope St Francis became the pope - only pope in history of Catholicism who has spoken for nature and for the animals
 - Gave me a message about finding balance - making sure that the joy is there because in nature there is always joy whether it's bees pollinating. So when the heavy comes in, find and remember the joy in your life and that will give you the strength
 - Bring ourselves back into a-lion-ment!
 - Lions represent the Sun
- Scientific side and Spiritual side
 - For me it is somewhere in between that because you have these incredible beings who when you connect with the you get spiritual downloads but they are also very physical and hunting, eating, fighting, mating, just like we are and do.
 - Seeing them both as incredibly wise beings and also part of our world and part of us rather than separate from us
- Global White Lion Protection Trust
 - Brings the sacred into science
 - Reintroduction of White Lions - not just to breed, it's about bringing genetics back into balance b/c they were removed from the wild by humans thinking they wouldn't survive and b/c they were beautiful and unique they wanted to breed and make money from them
 - White Lions are just as skilled at surviving in the wild if not more skilled
 - It's an interesting thing to think about color between white and tawny lions especially in South Africa and apartheid
- I've always felt our domestic cats connect us to the wild!
- I would bring folks to the Trust to teach animal communication but then when COVID hit I received guidance how to continue this and we started the Star Line Journeys, and did this virtually
 - We took you in as though you were there
 - The HEART pride is a gathering and now membership program to be financially and energetically supportive to the Trust and it's doing really well (Kristen can include in a follow up email)

ORIGINAL MEETING DESCRIPTION:

Interspecies Roundtable feat. Panthera - Sunday, 8/27/23 at 10 am PT/1 pm ET

Simply put, the Interspecies Roundtable is a gathering. Hosted by us humans and populated by a different species and their ambassadors each meeting. An opportunity for curious folk to pull up a seat around the table and stay awhile. A place for relationship building, a real 'get to know ya' kinda space. A detour from the cultural conversation that views animals as anything less than kin. To remember/restore invaluable interspecies relationships and symbiotic alliances, especially between humankind and particular animals. As we all find ourselves thoughtfully woven into the fabric of earth.

For now our intention is to connect with the animal kingdom, although who they are in relationship with are welcome: from flora to fauna to element, ancestor and beyond. Everyone joins with their expertise/experience so we may all bask in something bigger than the sum of our parts. Each participant brings their unique skills, body, biology, atmosphere, ecosystem, lens, medicine, relationships and stories to the space.

More specifically, the 'Roundtable' is both informal and intentional; an interdisciplinary, interspecies and symbiotic approach to becoming more acquainted with species with whom we share a world. Within this space of deep listening, we will be translating reflections/requests from animal guests while also learning ourselves how to align more elegantly with our landscapes, discovering joyful purpose there. To pause, take note and recall a shared mythology. Each meeting will also produce something tangible: biological information, meeting minutes, channeled sound, archived themes, participant reflections, inspired art, a recording and potential calls to action. Although the emphasis is not on the product, but on building a legacy of interspecies community and friendship.

No prior animal communication experience is required to attend. You are welcome to be an observer or dive in with us by sharing your unique gifts and communications. This is even an opportunity to expand your human and animal communication capacities in such a supportive nest. All preparations are handled by founding members of the group. And if you feel inspired to offer something to the space (i.e. scribe, artist, etc.), don't hesitate to reach out!

The backstory:

'Interspecies Roundtable' has been gestating since 2020. You might have heard whispers about it at other Fauna Speak events. Reading this right now might awaken a desire for connection within yourself. I spent two years co-visioning it up in my heart with the animals, waiting for just the right time ripe with human collaboration. I am so excited to witness this dream breathe and move amongst us!

My whole life I have craved a kinder world that considered our fellow earth dwellers. It is quite easy to feel despair on our planet, to experience helplessness in relation to human apathy, habitat loss and dwindling biodiversity. The animals have certainly been keeping my chin up about all these things, kindly suggesting how to navigate the emotional and physical ripples surrounding these phenomena. It surely takes patient fortitude to learn the systems of our earthen home and find appropriate ways to be in relationship with them. I have infinite gratitude to the interrealm and animal elders who continue to support and inspire my journey.

As humans return to a role of stewardship and deep kinship with all of life, I was inspired to curate a space that fosters clear communication, connection and reciprocal sovereignty. To create something that not only impacts participants, but can also be shared with folks in the future who hope to learn more about a particular species. To open doors for a wider population of humans interested in these realms of relating.

This Interspecies Roundtable invites PANTHERA (Leopard, Lion, Jaguar, Snow Leopard, Tiger) to join us on Sunday, August 27th, 2023. Does this event or species guest particularly resonate with you? Join us at the table at the hearth of hearts that is the world's largest cats. Understanding them both physically and energetically, as well as how we can support them while uncovering the innumerable ways their unique contributions support our world and make it such a beautiful place to dwell.

Make animal friends and human ones when you pull up a seat at the table. We meet six times a year, join anytime!

From this page you can book as a participant, observing participant, or contributing supporter. As a contributing supporter, you can invest in the legacy of this project even if you choose not to attend the gatherings.

Email me if you would like to contribute to the Interspecies Roundtable from your unique skill set of gifts: faunaspeak@gmail.com

Future gatherings are listed on my 'Events' page
